South America

From the wildlife of the Galapagos Islands and the ruins of Peru, to the bustle of Rio de Janeiro and the mystery of Patagonia, this is a continent of great diversity and intrigue.

South America is a unique destination that is sure to have something for the inquisitive traveler. Of its 12 countries and outlying islands, five areas in particular have become popular to travelers from across the globe. Argentina, Brazil, Chile, Ecuador, and Peru are amazing destinations to marvel at and explore—each for uniquely different reasons.

TRAVEL PROTECTION

Guests are required to have, at minimum, emergency medical evacuation protection for most destinations in South America. However, it is highly recommended that guests purchase a comprehensive travel protection plan to cover all non-refundable trip costs. Travel Beyond will provide a quote for protecting your trip investment with a Travelex protection plan.

DIETARY REQUIREMENTS & MEDICATIONS

Please be sure to notify Travel Beyond in advance of your trip if you have any specific dietary requirements or medical conditions, so we may alert the local ground operator and make necessary arrangements ahead of time. Travel Beyond will provide guests with a Guest Information Form prior to travel. You may use this form to communicate your dietary and medical requirements, or feel free to speak directly with your travel consultant.

LOST LUGGAGE

The security of your luggage is beyond the control of Travel Beyond. The airport controls what happens to passengers' luggage from the time it is checked in until it reaches baggage claim at

your final destination. We would like to suggest that you take the following precautionary measures:

* Pack a small carry-on bag with essentials, including any life-sustaining medication, money or valuables, your passport, a separate copy of your passport and a change of clothing.

* Keep your luggage claim tickets so that if your luggage is lost, you will have a reference for the airlines.

LOSS OF ARTICLES

Please note that Travel Beyond and our ground handlers cannot accept any responsibility for the misplacement of any articles while you are traveling. If you believe something is missing, notify the hotel manager or your local agent (ground handler) as soon as possible using the contact information provided on your emergency contact list. If your misplaced items are found, they will attempt to return them to you. In some cases additional fees may be incurred to deliver lost items. Any costs incurred will be on your own account.

PROBLEM SOLVING

If you have a problem while traveling, bring it to the attention of the hotel manager or ground operator right away. Please be proactive if you are unhappy with something during your stay. The ground handler will do what they can to accommodate your concerns, and will contact your Travel Beyond consultant as necessary.

RENTAL VEHICLES

An international driver's license may be required when renting a car abroad. We recommend that you carry an international driver's license which can be obtained at any AAA office. Several countries also require a US driver's license in addition to an international license.

WATER

Be sure to drink plenty of water while traveling, especially in warmer climates and at higher altitudes. Water from the tap is not safe for consumption. It is very important to use only bottled water for drinking and for brushing your teeth.
